

# Northeastern Plastics, Inc (NPI)- Ningbo

Located in the Ningbo university corridor and down the road from Ningbo University, The NPI-Ningbo distribution center is comprised of approximately 110,000 square meters of distribution and office space, with 51 full time personnel, in secure 3 buildings.

## PERSONNEL

As with any organization – people make the difference between success and failure.

Quality Control – as a U.S. company – we understand quality.

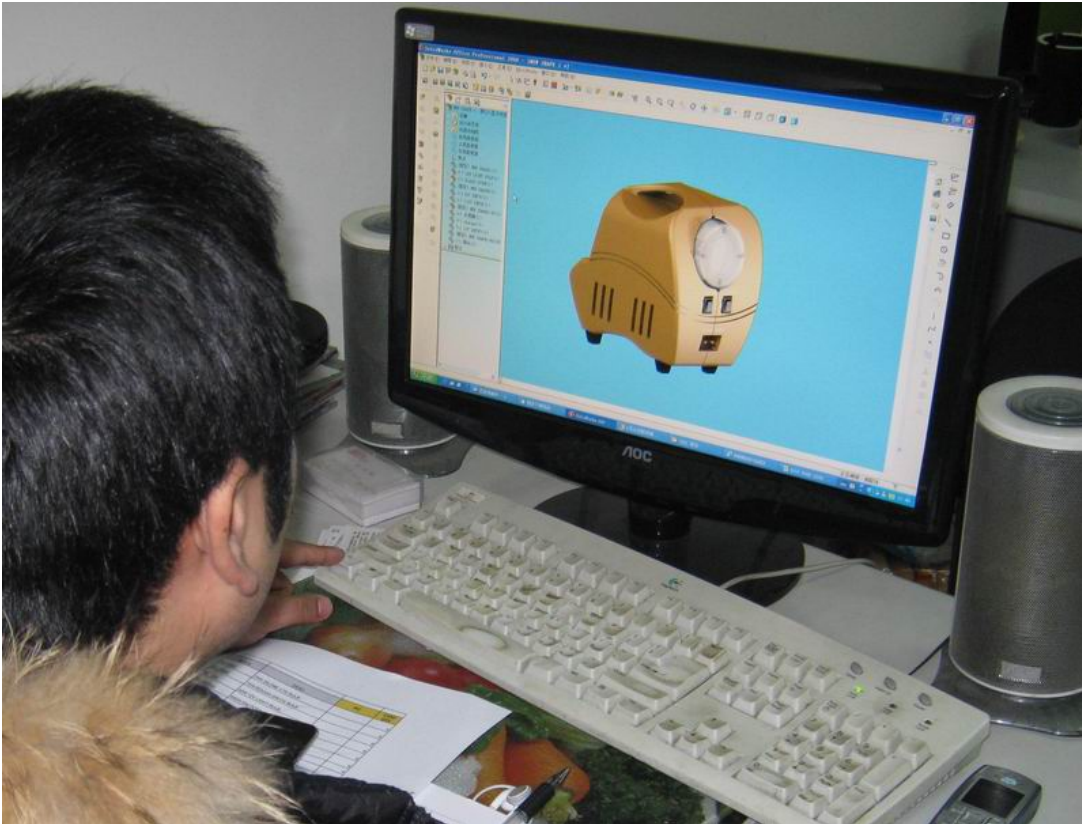

The NPI Ningbo office has no less than 6 full time highly trained quality control engineers on staff supported by 3 additional QC lab technicians based in our on site UL certified electrical lab for various electrical and lighting products.

Each and every NPI order is inspected by NPI QC personnel during WIP, packaging and again prior to container loading at our DC.

## Research & New Product Development

Currently the Ningbo office has 6 full time R&D developers and engineers using SOLID WORKS and PRO E for tooling design, item and display renderings , CAD/CAM and new item mock up designs. Since our programs are widely used by our US customers – we can easily share new product design files with our business partners.

## Transportation Logistics

Currently we warehouse, consolidate and schedule container loadings and transportation on a wide variety of electrical, hardware, kitchen and automotive products from our partner facilities and the Ningbo DC to the port of Ningbo and to various customers consolidators. Our Ningbo office has local relationships with all of the major carriers and forwarders.

## Warehouse & Security

- Each and every door and access point is monitored 24 hours, seven days a week.
- Gated access with a security check point and camera monitoring
- Employee identification cards & card readers at key points within the facility
- Facility access logs
- (14) Person staff
- Employer provided transportation and car pooling for our employees

## Field Work

### • Inspection & Assembly work

## Investments in China

- Tooling
- Equipment
- Personnel
- Raw Materials & Finished Goods

## Partner Print Facility's

Consistent packaging quality and color matching is a key concern for our customers. As such, we've made an investment in a Ningbo printing facility. All print jobs are through a single facility so as to maintain consistent packaging quality and control. We provide our production partners with the packaging – not the other way around.
